

100Gb/s CFP Optical Transceiver Module

SCF1000L4 Series

(100GBASE-LR4, ITU-T OTU-4, 1300nm 4-lane WDM, EA-DFB, PIN-PD)

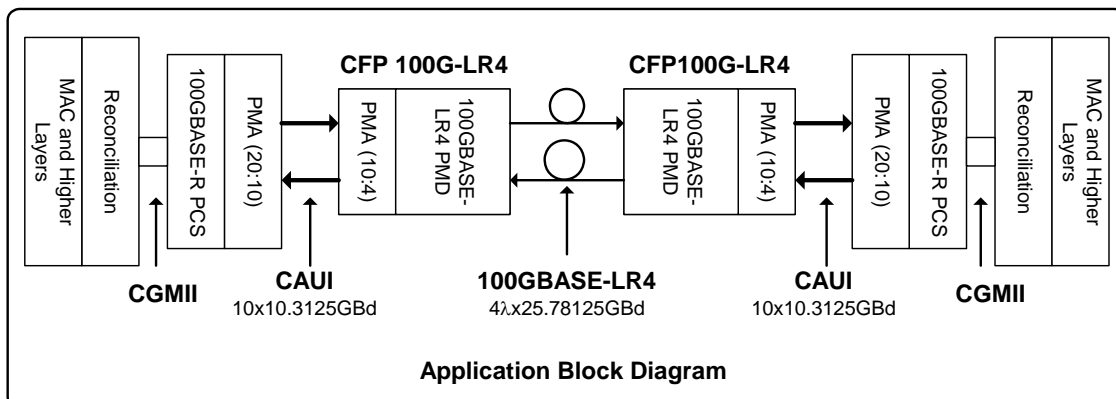

Features

- ◆ 4-lane x 25.78Gb/s L-WDM Optical Interface
 - High quality and reliability optical sub-assemblies
 - 1300nm Cooled WDM EA-DFB Transmitter with optical MUX
 - High Sensitivity PIN-TIA with optical DEMUX
 - 1300nm band with 800GHz spacing LAN WDM grid up to 10km over a SMF
- ◆ IEEE802.3ba Compliant
 - IEEE802.3 Clause 88 100GBASE-LR4
 - CAUI(10x10G) Electrical Interface
 - MDIO Interface for module management
- ◆ OTU-4 Rate Operation
 - 4x27.95 Gb/s lane operation to support OTU-4
 - ITU-T 411-9D1F compatible 2km Optical I/F Option Available
- ◆ CFP MSA Compliant
 - Easy supply management for hot pluggability
 - CFP MSA Form Factor
 - 148pin Electrical Connector
 - Duplex SC or LC Receptacle
- ◆ Low Power Consumption
 - 3.3V single power supply, 25W max.

Applications

- 100GE Enterprise switches and routers
- Carrier Grade 100GE Core-routers
- Point to Point and Ring Application
- Inter Rack Connection
- Other high speed data connections

1 General Description

The SCF1000L4 is the CFP optical transceiver module which is a hot pluggable form factor designed for high speed optical networking application. The SCF1000L4 is designed for 100Gigabit Ethernet application and provides 100GBASE-LR4 compliant optical interface, CAUI electrical interface and MDIO module management interface. The SCF1000L4 converts 10-lane 10.3Gb/s electrical data streams to 4-lane LAN-WDM 25.78Gb/s optical output signal and 4-lane LAN-WDM 25.78Gb/s optical input signal to 10-lane 10.3Gb/s electrical data streams. This 10-lane 10.3Gb/s electrical signal is fully compliant with 802.3ba CAUI specification and allows FR4 host PCB trace up to 25cm.

The high performance Cooled LAN-WDM EA-DFB transmitter and high sensitivity PIN receiver provide superior performance for 100Gigabit Ethernet applications up to 10km links and compliant optical interface with IEEE802.3ba Clause 88 100GBASE-LR4 requirements..

2 Functional Description

The SCF1000L4 CFP transceiver is a bi-directional module with a transmitter and receiver in one package. The SCF1000L4 contains a duplex SC or LC connector for the optical interface and a 148-pin connector for the electrical interface. Figure 2.1 shows the functional block diagram of SCF1000L4 CFP transceiver. SCF1000L4 contains electrical 10:4 Mux, 4:10 DeMux, 4-lane optical transmitter, 4-lane optical receiver and module management block including MDIO interface.

Transmitter Operation

The transceiver module receives 10-lane 10.3Gb/s CAUI electrical inputs. CDR reshapes and retimes received electrical signal to compensate the degraded electrical signal which comes through host board and host connectors. A reference clock from host card is 1/64 frequency of TX CAUI lane rate and should be synchronized to TX CAUI input signal. 10 to 4 electrical Mux synthesizes 4-lane rate clock from the reference clock and multiplexes 10-lane received signals to 4-lane electrical signals. The multiplexed 4-lane signals are fed to the transmitters. The four transmitters convert 4-lane signals to an optical signal through 4 Laser drivers and Lasers diodes which are packaged in the Transmitter Optical Sub-Assembly (TOSA). Each Laser launches optical signal in specific wavelength specified in IEEE802.3ba 100GBASE-LR4 requirements. These 4-lane optical signals will be optically multiplexed into one fiber by 4 to1 Optical WDM MUX. The optical output power is held constant by an automatic power control (APC) circuit. The transmitters output can be turned off by TX_DIS hardware signal and/or through MDIO module management Interface.

Receiver Operation

The SCF1000LR receives 4-lane LANWDM optical signals. The optical signals are de-multiplexed by 1 to 4 optical DEMUX and fed into each Receiver Optical Sub-Assembly. Each ROSA converts optical signal to electrical signal. The regenerated electrical signals are retimed and de-jittered by the CDRs inside the 4:10 electrical DeMux. The retimed 4-lane received signals are de-multiplex to 10-lane signals by the 4 to 10 electrical DeMux. The 10-lane signals are compliant with IEEE CAUI interface requirements. Each received optical signal is monitored by the DOM section. The monitored value is reported through the MDIO section. If one or more received optical signal is weaker than the threshold level, RX_LOS hardware alarm will be launched.

Management Data I/O (MDIO)

The SCF1000L4 supports the MDIO interface specified in IEEE802.3 Clause 45. This 2-wire management data I/O interface is provided for the module status monitoring and control. The management data clock (MDC) provides clocking for the data that is passed on the MDIO port. Five further pins allow for loading of a port address (PORT_ADDR0-4) into the module.

Measured received input power in uW, a 16-bit unsigned integer with LSB = 0.1 uW, representing a power range from 0 to 6.5535 mW (-40 to +8.2 dBm). Value can represent either average received power or OMA depending upon how bit 3 of Register 8080h is set. Accuracy must be better than +/- 2dB over temperature and	0000h

9 Qualification Testing

The SCF1000L4 series 100Gb/s transceivers are qualified to Sumitomo Electric Industries internal design and manufacturing standards. Telecordia GR-468-CORE reliability test standards, using methods per MIL-STD-883 for mechanical integrity, endurance, moisture, flammability and ESD thresholds, are followed.

10. RoHS COMPLIANCY

Compliance versus requirements contained inside the following reference document is guaranteed: "Directive 2002/95/EC of 27 January 2003 on the restriction of the use of certain hazardous substances in electrical and electronic equipment" from official journal of European Union (European Parliament and of the Council). This product is Compliant at RoHS-6/6 level and contains no leaded solders.

11. Laser Safety Information

The SCF1000L4 series transceivers use a semiconductor laser that is classified as Class 1 laser products per the laser safety requirements of FDA/CDRH, 21 CFR1040.10 and 1040.11. These products have also been tested and certified as Class 1 laser products per IEC60825-1:2007 and IEC60825-1:2001 International standards.

Caution

If this product is used under conditions not recommended in the specification or is used with unauthorized revision, the classification for laser product safety is invalid. Reclassify the product at your responsibility and take appropriate safety measures.

12. Electromagnetic Compatibility

EMI (Emission)

The SCF1000L4 series 100Gb/s transceivers are designed to meet FCC Class B limits for emissions and noise immunity per CENELEC EN50 081 and 082 specifications.

RF Immunity

The SCF1000L4 has an immunity to operate when tested in accordance with IEC 61000-4-3 (80- 1000MHz, Test Level 3) and GR-1089.

Electrostatic Discharge (ESD) Immunity

The SCF1000L4 has an immunity against direct and indirect ESD when tested accordance with IEC 61000-4-2.

13. Ordering Information

Part Numbering System

Evaluation Board Kit

For test purposes the evaluation board model number SK1000A may be ordered to use with the SCF1000L4 series transceivers.
